EDUCATION

JECRC University, Jaipur <i>Bachelor of Technology in Computer Science</i>	2023 – 2027 CGPA: 7.66
Soni Academy Sr. Sec. School <i>Class XII(RBSE)</i>	2022 85.6%
Soni Academy Sr. Sec. School <i>Class X(RBSE)</i>	2020 88%

PROJECTS

ProjectHub <i>React.js, Node.js, Express.js, MongoDB</i> GitHub Live Demo	Feb 2026 – May 2026
- Developed a full-stack project management platform with role-based authentication and authorization using JWT and bcrypt for secure data protection. - Implemented project creation, task assignment, progress tracking, and budget monitoring features. - Optimized database queries and built interactive dashboards, improving application performance and data retrieval speed for cross-functional teams. - Integrated MongoDB and REST APIs for secure data storage and real-time project management.	
Quizora AI <i>TypeScript, Node.js, Redis, WebSockets, AI APIs</i> GitHub	Dec 2025 – Jan 2026
- Developed a full-stack AI-powered platform using React, TypeScript, Node.js, and MongoDB, allowing users to instantly generate and host interactive assessments from uploaded PDF documents. - Engineered a custom RAG (Retrieval-Augmented Generation) pipeline via LangChain; utilized Google Gemini embeddings and in-memory vector caching to perform semantic similarity searches on uploaded PDFs, feeding optimized context into the Groq LLM for instantaneous question generation. - Developed a highly concurrent multiplayer engine using native WebSockets, supporting real-time lobby synchronization, countdown timers, and live leaderboard updates without client-side polling. - Secured backend infrastructure by implementing JWT authentication with bcrypt password hashing, and utilized strict Zod schema validation to sanitize and verify AI-generated JSON payloads before MongoDB insertion, preventing database corruption from LLM hallucinations.	
Diabetes Prediction Model <i>Python, Scikit-Learn, Pandas, NumPy</i> GitHub	Sep 2024 – Oct 2024
- Developed a machine learning model to predict the likelihood of diabetes using patient health data. - Performed data preprocessing, feature selection, and exploratory data analysis using Pandas and NumPy. - Trained and evaluated classification models using Scikit-Learn to improve prediction accuracy. - Implemented performance metrics such as accuracy, precision, recall, and F1-score for model evaluation.	

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, Python, Java
Frontend: React.js, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel,
Libraries: Scikit-Learn, NumPy, Pandas
Core CS: Data Structures & Algorithms, OOPS, DBMS, Operating Systems, Computer Networks

CERTIFICATIONS

Machine Learning with Python - IBM Link	Feb 2025
Artificial Intelligence & Machine Learning Mentorship - Pregrad Link	Jul 2024 – Oct 2024

ACHIEVEMENTS

Solved 150+ DSA problems on competitive platforms like LeetCode and GeeksforGeeks.	2023 – Present
Achieved Champion Tier in Google Cloud Skills Boost 'The Arcade' program.	Sep 2025
